The adopted [Downtown Area Plan Amendment](https://www.denvergov.org/content/denvergov/en/community-planning-and-development/planning-and-design/plans-in-progress/Downtown%20Area%20Plan%20Amendments.html)

[<https://www.denvergov.org/content/denvergov/en/community-planning-and-development/planning-and-design/plans-in-progress/Downtown Area Plan Amendments.html>](https://www.denvergov.org/content/denvergov/en/community-planning-and-development/planning-and-design/plans-in-progress/Downtown%20Area%20Plan%20Amendments.html)

calls for the Central Platte Valley-Auraria district to "develop into a place that welcomes and attracts people of all ages, races, religions, or incomes who want to live, work or play downtown." Three new Denver Zoning code districts are proposed to implement this objective. These new districts cross-reference specific affordable housing provisions to be included in Denver Revised Municipal Code Chapter 27 Article VI that would apply to structures using 'incentive height.'

This amendment establishes affordable housing provisions for use of incentive height in the proposed Downtown Central Platte Valley-Auraria zone districts, including requirements for the payment of incentive height fees, the construction of additional affordable units than otherwise required, or the provision of other community-serving uses, in excess of standard requirements, in compliance with the city's affordable housing goals and applicable ordinances. The provisions for use of incentive height vary depending on project size:

- Standard Projects (projects not meeting the definition of a large/phased project) could access incentive requirements by meeting formula-based affordable unit or fee requirements similar-to the requirements currently applied in the 38th and Blake Station

Area Incentive Overlay.

- Large/Phased Projects (projects built on 5+ acres, with 500+ residential units, or in multiple phases) could access incentive requirements by preparing an affordable housing plan providing a comparable quantity of affordable units as would be required for a smaller 'standard' project while also addressing a range of affordability levels and other conditions.
