

## Legislation Details (With Text)

**File #:** 19-0064 **Version:** 1

**Type:** Bill **Status:** Passed

**File created:** 1/22/2019 **In control:** Finance & Governance Committee

**On agenda:** 2/19/2019 **Final action:** 2/19/2019

**Title:** A bill for an ordinance amending the classification and pay plan for employees in the Career Service and for certain employees not in the Career Service.  
Amends the Classification and Pay Plan by creating new classifications of City Planner Staff at paygrade E-810, Airport Planner Staff at paygrade E-811, Airport Planner Associate at paygrade E-813, Airport Planner Senior at paygrade E-815, Airport Planner Principal at paygrade E-817, Manager Airport Planning at paygrade E-819, Manager City Planning at paygrade E-819, and Director City Planning at paygrade E-821, and changes the title of six associated planner classifications and the pay grade of ten associated planner classifications. The Committee approved filing this bill by consent on 1-29-19.

## OHR/CSA Request Template

**Date Submitted:** 1-22-19

**Requesting Agency:** Office of Human Resources  
**Division:**

**Subject Matter Expert Name:**

Name: Blair Malloy
Email: blair.malloy@denvergov.org

**Item Title & Description:**

*(Do not delete the following instructions)*

*These appear on the Council meeting agenda. Initially, the requesting agency will enter a 2-3 sentence description. Upon bill filing, the City Attorney's Office should enter the title above the description (the title*

should be in **bold** font).

Both the title and description must be entered between the red "title" and "body" below. Do **not** at any time delete the red "title" or "body" markers from this template.

**A bill for an ordinance amending the classification and pay plan for employees in the Career Service and for certain employees not in the Career Service.**

Amends the Classification and Pay Plan by creating new classifications of City Planner Staff at paygrade E-810, Airport Planner Staff at paygrade E-811, Airport Planner Associate at paygrade E-813, Airport Planner Senior at paygrade E-815, Airport Planner Principal at paygrade E-817, Manager Airport Planning at paygrade E-819, Manager City Planning at paygrade E-819, and Director City Planning at paygrade E-821, and changes the title of six associated planner classifications and the pay grade of ten associated planner classifications. The Committee approved filing this bill by consent on 1-29-19.

**Affected Council District(s) or citywide?**

**Executive Summary with Rationale and Impact:**

*Detailed description of the item and why we are doing it. This can be a separate attachment.*

The proposed change amends the Classification and Pay Plan by creating new classifications of City Planner Staff (E-810), Airport Planner Staff (E-811), Airport Planner Associate (E-813), Airport Planner Senior (E-815), Airport Planner Principal (E-817), Manager Airport Planning (E-819), Manager City Planning (E-819), and Director City Planning (E-821). The proposed change also amends the Classification and Pay Plan by changing the title of six associated planner classifications and changing the pay grade of ten associated planner classifications.

This study is the result of a request to create a new classification series of airport planners for Denver International Airport. Incumbents are classified in the City Planner classification series. Due to changes in the professional planning industry and more substantial organizational impacts, it was decided to review all professional planners' pay grades across the city.

Because of industry changes, management expressed challenges with attracting and retaining talented planners to work for the CCD. The CCD has a variety of professional planners who specialize in various fields, such as community planning, land use, historic preservation, urban planning, transportation planning, airport planning, and other related areas of specialized planning requiring advanced education and experience. In addition to Denver International Airport, these classifications are also used within the Department of Community Planning and Development and in the Department of Public Works.

The purpose of this study was to (1) create a new class series specific for airport planning, (2) review the existing City Planner class series and Development Project Coordinator classification series and related organizational structure to ensure it reflects the current needs, (3) review market data to provide competitive pay ranges for the new and revised classifications.

The research found that Airport Planning is a separate niche in the planning profession. Currently, all planners in the city are classified in the city planner class series. However, to remain competitive with the market, it is proposed to create a new class series for airport

planning. This is supported by management at DEN. The existing city planner class series would remain and be used by planners elsewhere in the city, performing other types of specialized professional city planning work.

This study proposes the following five recommendations: (1) Update the titles of existing classifications as described in the report to better represent the type and level of work; (2) Create a new airport planning classification series; (3) Create three new classifications, City Planner Staff, Manager City Planning, and Director Airport Planning in the city planner classification series; (4) Establish the grades and ranges for the new and existing classifications in the airport planning series; and (5) Change the pay grades for the current classifications and establish the pay grades and ranges for the new classifications in the city planner classification series.

**Synopsis:**

This study is the result of a request to create a new classification series of airport planners for Denver International Airport. Incumbents are classified in the City Planner classification series. Due to changes in the professional planning industry and more substantial organizational impacts, it was decided to review all professional planners' pay grades across the city.

Because of industry changes, management expressed challenges with attracting and retaining talented planners to work for the CCD. The CCD has a variety of professional planners who specialize in various fields, such as community planning, land use, historic preservation, urban planning, transportation planning, airport planning, and other related areas of specialized planning requiring advanced education and experience. In addition to Denver International Airport, these classifications are also used within the Department of Community Planning and Development and in the Department of Public Works.

The purpose of this study was to (1) create a new class series specific for airport planning, (2) review the existing City Planner class series and Development Project Coordinator classification series and related organizational structure to ensure it reflects the current needs, (3) review

market data to provide competitive pay ranges for the new and revised classifications.

The research found that Airport Planning is a separate niche in the planning profession. Currently, all planners in the city are classified in the city planner class series. However, to remain competitive with the market, it is proposed to create a new class series for airport planning. This is supported by management at DEN. The existing city planner class series would remain and be used by planners elsewhere in the city, performing other types of specialized professional city planning work.

This study proposes the following five recommendations: (1) Update the titles of existing classifications as described in the report to better represent the type and level of work; (2) Create a new airport planning classification series; (3) Create three new classifications, City Planner Staff, Manager City Planning, and Director Airport Planning in the city planner classification series; (4) Establish the grades and ranges for the new and existing classifications in the airport planning series; and (5) Change the pay grades for the current classifications and establish the pay grades and ranges for the new classifications in the city planner classification series.

### **Pay Rationale:**

#### **Airport Planning Series:**

Published data were used from the 2018 ACI Compensation and Benefits Survey. Five (5) new titles are proposed and were used for comparison to the survey data. One (1) existing title, Director Airport Planning and Noise was also reviewed and matched to survey data. In this existing class, the noise responsibilities were removed following department changes to no longer require management of the airport noise office within the scope of this position. This title will be updated to reflect this change to Director Airport Planning. The ACI survey positions were reviewed for a match of 70% to the duties of the classifications below. This is the industry standard for determining a survey match.

Market data was used to establish the pay grades for the existing class, Director Airport Planning, and new classes Manager Airport Planning and Airport Planner III. Director Airport Planning: This classification is a match in the ACI survey, position of Director Airport Planning. The current pay grade of this classification is E-819. The average range midpoint is \$154,073. This rate is 2.5% above the midpoint of pay grade E-821, \$150,180. It is proposed to use the market recommended grade of E-821. Manager Airport Planning: This classification is a match in the ACI survey, position of Manager Airport Planning. The average survey range midpoint is \$135,437. This rate is 3.0% above the midpoint of pay grade E-819, \$131,419. It is proposed to use the market recommended grade of E-819. Airport Planner III: This classification is a match in the ACI survey, position of Planner. The average range midpoint is \$97,062. This rate is 3.7% below the midpoint of pay grade E-815, \$100,635. It is proposed to use the market recommended grade of E-815.

Internal equity was used to establish the pay grades for the new classes, Airport Planner I, II, and IV. Airport Planner I: It is proposed to use pay grade E-811, midpoint \$77,062. This is based on internal equity and the established compensation practice to provide two pay grades between an entry-level classification and the next highest-level classification. Airport Planner II: It is proposed to use pay grade E-813, midpoint \$88,062. This is based on internal equity and the established compensation practice to provide two pay grades between classifications in a series. Airport Planner IV: It is proposed to use pay grade E-817, midpoint \$115,001. This is based on internal equity and the established compensation practice to provide two pay grades

between classifications in a series.

#### City Planning Series:

A custom survey was conducted of local and national survey contacts. The following title changes are proposed to the existing titles to better align with industry titles and to simplify job titles with city naming conventions: Development Project Coordinator Associate and Development Project Coordinator Senior - change the word Coordinator in these titles to Administrator to better define the scope and level of responsibility of exempt-level professional level work. It is also proposed to simplify the title of the Development and Planning Supervisor by removing word Development and call this class Planning Supervisor.

This survey was conducted in June 2018. One hundred forty-eight local and national jurisdictions were contacted. All national data sources were adjusted to the Denver market using ERI's geographic adjustment for each data point. This resulted in 41 jurisdictions' data provided as an excellent match to one or more positions and was analyzed for a 28% valid response rate.

Although market data obtained from the custom survey indicates that the city planner classes are at or over the market currently, the recommendations are to change the pay grades for these classes. This will ensure internal equity is maintained between the Airport Planner series and the City Planner series. These classes will be used alongside the airport planners at the airport, require the same expertise and level of education, and have the same scope and decision making. The difference is the specialization of the level of education and training required of airport planners. The recommendations outline the final recommended pay grade. By increasing the pay grades, it will maintain the competitiveness of the pay grades to attract and sustain the level of professionals performing this type of work and will reduce the risk for employees leaving planning positions for other employers.

The proposed pay grades for the new and existing classes are as follows:

- City Planner Staff: This is a new class. It is proposed to use pay grade E-810, range midpoint \$150,180. This is the entry level into the City Planner class series. It will establish a -2 relationship between this class and the City Planner Associate, the next higher level in the City Planner class series.
- Development Project Administrator Associate: The current pay grade is E-810, midpoint \$72,088. It is proposed to use pay grade E-812, midpoint \$82,379. This is based on internal equity make the pay grade for this class equal to the City Planner Associate and one pay grade less than the proposed pay grade of the Airport Planner II. All three of these titles are considered at the same, developmental/intermediate professional level.
- City Planner Associate: The current pay grade is E-811, midpoint \$77,062. It is proposed to use pay grade E-812, range midpoint \$82,379. This will establish a -1 relationship between this class and the Airport Planner II and will maintain internal equity between these classes whose scope and level and considered comparable.
- Development Project Administrator Senior: The current pay grade is E-812, midpoint \$82,379. It is proposed to use pay grade E-814, range midpoint \$100,635. This will establish a -1 relationship between this class and the Airport Planner III and will maintain internal equity between these classes whose scope and level and considered comparable.
- City Planner Senior: The current pay grade is E-813, midpoint \$88,062. It is proposed to use pay grade E-814, range midpoint \$100,635. This will establish a -1 relationship between this class and the Airport Planner III and will maintain internal equity between

these classes whose scope and level and considered comparable.

- City Planner Principal: 8 The current pay grade is E-815, midpoint \$100,635. It is proposed to use pay grade E-816, range midpoint \$107,578. This will establish a -1 relationship between this class and the Airport Planner IV and will maintain internal equity between these classes whose scope and level and considered comparable.
- City Planner Supervisor: This pay rate is 0.7% below the midpoint of pay grade E-814, \$94,138 The current pay grade is E-815, midpoint \$100,635. It is proposed to use pay grade E-817, range midpoint \$115,001. This will establish a +1 relationship between this class and the Principal City Planner, whom this class will supervise.
- Manager City Planning: This is a new class. It is proposed to use pay grade E-819, range midpoint \$131,419. This will establish a +2 relationship between this class and the Planning Supervisor, whom this class will supervise.
- Director City Planning: This is a new class. It is proposed to use pay grade E-821, range midpoint \$150,180. This will establish a +2 relationship between this class and the Manager City Planning, whom this class will supervise.

### **Employee Impact:**

This will impact 90 employees in four (4) departments/agencies as follows:

<b>Agency</b>	<b>Current Job Title</b>	<b>Proposed Job Title</b>	<b>Employee Count</b>
<b>CPD Community Planning &amp; Development Agency</b>	City Planner	City Planner	24
	Associate	Associate	
	City Planner Senior	City Planner Senior	19
	Development and Planning Supervisor	City Planner	3
