Executive Summary with Rationale and Impact:

Detailed description of the item and why we are doing it. This can be a separate attachment.

The proposed change amends the Classification and Pay Plan by changing the title and pay grades of various associated labor and equipment operator classifications.

OHR has convened a group of citywide leaders who manage the hundreds of labor and equipment operator positions across the city in a variety of diverse field work settings and assignments. This group has expressed concerns and difficulties with these classifications, which are CDL driving and labor positions who are having a challenging time attracting and retaining employees. This group feels strongly based on conversations with existing and potential employees that pay is a contributing factor to these challenges, of which market data confirms.

As a result, the Office of Human Resources (OHR) Classification and Compensation Division conducted a compensation market study of the Equipment Operator series. This series consists of eight (8) classifications. Other classifications were included due to established pay relationships.

OHR analyzed turnover data and exit interviews for 2018 and the data strongly supported this proposal. Turnover data was extremely high for both the Utility Worker Senior and the Equipment Operator. Turnover data was 28.09% for Utility Worker Senior with only 5.62% being involuntary and 22.47% being voluntary. The total turnover for Equipment Operator was 35.26% with 4.96% being involuntary and 30.30% was voluntary. Exit interview data stated pay as being a huge factor in why employees left the city.

Based on a combination of the market lag, 2018 turnover data, the low perception of pay on exit interviews, and managers expressing difficulty recruiting and retaining employees, are all reasons prompting us to propose these recommendations.

It is also recommended to change various titles to align better with market naming and to define this series better. The Equipment Operator classification series is recommended to change titles to Equipment Operator I through IV. The Semi Tractor Trailer Operator classification is recommended to change the title to Tractor Trailer Operator. The Crew Supervisor is recommended for a title change to Crew Lead to describe the work being performed accurately. There was confusion amongst agencies on whether the classification was a lead or a supervisor. It was found that only 11 of the 54 are supervising subordinate staff, and the other positions are used as a lead worker. Because of this, the classification specification was revised to describe permanently-assigned lead duties, allowing for supervision by position. The Closed Circuit Television Technician I through III was changed to Wastewater Video Inspector I through III to be consistent with industry standards.
