Type and Scope of services to be performed:

Technology Services has been successfully using the Catapult Valo software for a couple of years now and requires the continual use and support. This software allows the creation of a seamless SharePoint experience for all City Agencies. The software creates internet as a service and drives user adoption. An intranet is an internal website intended for employee information and is not open to the general public. The continual support and licensing can only be purchased through Catapult.

Catapult's Valo software is used on DenverHub SharePoint which is now the default homepage for all browsers used by City employees. Several other agency SharePoint sites, including DSD and DEDO, also use Valo. The Valo software enhances the SharePoint experience by providing a custom navigation menu as well as numerous other options to display data and page layouts that make the sites more user friendly. The software also includes a banner message that allows communication with employees on their browser homepage.

Catapult is a leader in the SharePoint space and has created a model for successful implementations and ongoing support. This includes upgrade support with Office 365, best practices, portal roadmaps and coaching with content owners as well as a proprietary template that will unify the SharePoint experience across all agencies providing a consistent look and feel and a portal experience for all city users.
