Vendor/Contractor Name (including any "DBA"): Colorado Department of Transportation

Type and Scope of services to be performed:
CDOT is conducting a wetland study at Summit Lake Park by with a permit for access and use of the park and study area. The study will determine the options for making repairs to the Mount Evans Road, a CDOT road that passes through Summit Lake Park. The study's objectives are to investigate the interaction between the natural hydrologic processes upgradient from the road and the roadway across alpine wetland ecosystems to determine the road effects on downgradient hydrologic regime, soils, soil temperature and permafrost, and vegetation. Long-term goals of the research include identifying options for road reconstruction to minimize permafrost and hydrologic impacts on such roadways, and minimizing or restoring impacts to alpine wetland ecosystems in the Summit Lake Park area that may be caused by the roadway.
