Veoci will continue providing licensing and support and maintenance services for the Event Management System. This system is used by DEN Operations for our Part 139 compliance and Airport Logbook functions.

This is for FAA regulation compliance. For instance, it's used to capture data about the conditions of the airfield and also captures data like wind conditions, Notices of Airmen, weather conditions, etc. The FAA requires this system so that in the event of a severe event, we can recreate the scenario with this captured data.
