Vendor/Contractor Name (including any "DBA"): TargetSolutions Learning, LLC

Type and Scope of services to be performed:

The Purchasing Department, on behalf of the Technology Services and the Denver Fire Department (DFD) facilitated a solicitation for the purchase of a Learning Management System (LMS). TargetSolutions was awarded and DFD has incorporated that system to improve upon their current learning based processes. The LMS supports improved business processes through process automation, electronic support of information presentation, and information with regards to eliminating manual efforts and redundant paper based efforts. The LMS is a training solution built with unique features and functionality to fit DFD's critical training needs. It provides one place for all training needs - from assigning, tracking and reporting on course completions, to tracking license and credential requirements, to identifying employee skill gaps. The LMS makes it easier to build a culture of training, safety, and compliance.

DFD uses the LMS to test, certify, and license all installers for multiple disciplines such as: Fire Alarm, Sprinkler, Extinguisher, Fire Pumps, Mass Notification, Health Care Coordinator, Elevator/Conveyance, Venue, Evacuation, Central Station Monitoring, Central Station Runner, Multifamily Certified Inspector, Fire Watch Coordinator and Fire Safety Administrator certification programs.

This LMS is integral to the training, certification and licensing needed by DFD. As part of the City's use of the LMS software, the City pays an annual fee for licensing and software support and maintenance. Software support and maintenance services include remote troubleshooting and support provided via the telephone and online channels, as well as installation assistance and basic usability assistance. Software support services may also include new product installation services, installation of product updates, migrations for major releases of software and other types of proactive or reactive on-site services, future minor versions or future major releases of software. These support services are employed to ensure the application is functioning at its maximum capacity.

This amendment will allow DFD to continue with the use of the LMS software. **Location (if applicable):**
